M. D. of Buffalo Coulee
Hold Monthly Meeting

November 10, 1934.—Council meeting was held in Saltaux School with all the members present and Reeve Phessey presiding.

Minutes of meeting of October 13 were read and confirmed on motion of Cr. Dew.

Monthly statement for October was read by Secretary and Reeve signed same.

Mr. Geo. Leeson was present and asked assistance in the way of payment for hospitalization. Mr. Leeson's father was also present and agreed to give security for such assistance and after some discussion it was decided on motion of Cr. Ramsay that Cr. Hills and the Reeve continue as a committee to deal with the case and 15-49-9-4 necessary action as soon as information received from Edmonton. Secretary to phone as soon as possible for said information.

Mr. H. H. Burch was present to discuss with the Council the matter of seizure made on the S.W. 34-48-8-4. No further action.

Mr. Herman Zuberbier attended and protested against seizure made on his grain for taxes on the S. 1/4 15-49-9-4, stating that he was giving up the land and the C.P.R. would pay. Cr. Hills moved that seizure be released after quit claim is given to C.P.R. and current taxes are paid on N.E. 27-48-9-4. Lost on a 5 to 1 vote. Cr. Ramsay moved and carried that Mr. Zuberbier be made out in the name of the municipality and to be applied on the taxes on the S. 1/4 15-49-9-4. This was agreed to by Mr. Zuberbier.

Mr. Larry Shannon was present and asked that he be allowed to hold his seized grain in the hope of price advancing. Cr. Hills carried that he be given until Dec. 15 or if consolidation payment date is extended, then to such extended date.

Letters read from the relief branch advising all past authorizations cancelled and that new applications required if necessary to continue. Cr. Ramsay carried that T. G. Uphill be given \$10 per month and Cr. Curry carried that \$12 per month be recommended for Mrs. Baldwin.

Hospital notices were read. Secretary to advise University Hospital that the Reeve would interview them shortly re Vivian Baldwin. Also to ask Mr. Bruce Wilson to attend next Council meeting to discuss the case of his daughter who has been admitted to the Central Alberta Sanatorium.

A letter was read from B. F. Ackerman & Co. re sale of S.E. 14-48-8-4. Cr. Hills carried that a copy of this letter be sent to the D.M.A. and that approval of sale be asked for.

A letter was read from the D.M.A. re sale of N.W. 6-49-9-4, secretary instructed to reply and ask for approval of sale.

An offer of \$800 for purchase of the N.W. 28-49-9-4 on terms was refused on motion of Cr. Ramsay. Cr. Hills moved and carried that resolution agreeing to accept from the Manville

Credit Society the amount of taxes to the end of 1934 for this land be hereby recinded.

Cr. Ramsay moved and carried that Cr. Hill and Hetherington be delegated to the Municipal Convention. Cr. Dew carried that they be allowed \$30 each for expenses.

Secretary instructed to write further re Kaminski case.

List of seizures reviewed: Cr. Hetherington to interview Geo. Pollard and arrange for hauling of grain. Secretary to write W. E. Judson, and to send notice to all who have not paid and where seizure was made asking delivery in ten days. Cr. Hills carried that Cr. Ramsay and the Reeve be a committee with power to act concerning seizures made.

Report was made by the committee appointed to interview doctors re care of indigent sick. Dr. Knapp was present and asked payment of several accounts totalling \$301, offering to accept \$160 as full payment. Each Councilor took note of those in his division and is to investigate and report at next meeting. He also submitted a proposition to take care of all work in the Manville hospital area. It was agreed by the Council that this matter should be submitted to the annual meeting before adoption and it was decided on motion of Cr. Dew to carry on as at present to the date of such meeting.

A letter was read from R. H. Cautley, D.L.S., re cancellation of a certain diversion. No action taken.

Report of impounding of pigs in the pound kept by C. W. Allan was read. Cr. Hills carried that expenses of 3.50 be paid.

A letter was read from the D.M.A. in answer to a query, advising that, under existing Act, tax Recovery land could only be leased for a term of one year.

Cr. Dew carried that Wild Lands Tax be cancelled on W. 1/4 31-48-8-4. Cr. Curry reported re Mrs. Martha McDowell's sale.

Cr. Hills reported re M. Hedstrom estate.

Cr. Ramsay carried that following livestock be reviewed and paid: Div. 1. P-1, 100.95; Div. 2. K-2, 35.00; L-2, 21.75; M-2, 63.45; N-2, 30.00; O-2, 10.00.

Div. 3. J-3, 21.25; K-3, 94.50; L-3, 65.00.

Div. 4. K-4, 116.50.

Div. 5. P-5, 16.25; Q-5, 30.00; R-5, 165.00; S-5, 78.00.

Div. 6. L-6, 52.00; J-6, 34.00; K-6, 141.00.

Cr. Dew carried that the following bills be paid: Robt. B. Bennett, weed inspections half-day, \$3; L. H. Barrs, hauling culverts, Div. 3, 3.50; To taxes on S. 1/4 15-48-9-4, compensation, Div. 3, \$10; R. H. Cautley, survey N.E. 22-48-9-4, Div. 4, \$45; A. C. Currie, repairs, Div. 3, 4.50; Autumn Leaf Co-op, repairs, Div. 1, 3.15; Mother's Hospital, re: Teddy Galusha 4.15; Nellie Schlender 324, G. Guyon 756; 28.90; Dr. W. W. Bell, re Vivian Baldwin 115; Roy W. Hay, Oct. salary \$90, phone 10c, mileage and seizures 48.15.

NEWS ITEMS
FROM JARROW

We are sorry to learn that Harry Symonds has lost his position in the Alberta Pacific elevator. George Eshpeters of Dayland has been appointed as Mr. Symonds' successor.

Mr. and Mrs. Hugh McGilvray of Edmonton, old time friends of Mr. and Mrs. John Waite, visited at the home of the latter for a few days last week. These friends had not met for twenty years and the visit was a real treat.

A narrow escape from drowning happened last week as Mr. Stanley Lissen and his son Harold with three other men attempted to cross a lake on the ice. The car began to sink and the five men within were compelled to climb through the car windows upon the ice to safety, but not before they were thoroughly drenched in the icy water. The car sank in six feet of water with just the top visible. The occupants were fortunate to escape death.

Miss Thelma Miller of Kinsella spent a couple of days visiting at the manse.

Rev. and Mrs. Griffith, accompanied by Mrs. John Waite, motored to Viking last Tuesday to attend the S. S. Institute which was held in the United church. Afternoon and evening sessions were held. Addresses on S. S. work were delivered by D. K. Allan of Tofted, R. W. Griffith of Jarro, R. W. Hibbert of Calgary, R. C. Perry of Killam and C. G. Purvis. The round table discussion led by Rev. Hibbert was very valuable and practical. The ladies of the Viking United church served a delicious supper at 6 o'clock. The institute was thoroughly enjoyed by all. The success of the Institute must be attributed to the efforts of Dr. Stanley Scott.

Mr. Fred Coe arrived home last week from B.C. He is walking on crutches but is getting along as well as expected after his serious accident.

Mrs. George Theron and Mrs. Ken Carter took advantage of the week-end excursion and visited Edmonton last week.

Minutes of Special Meeting
M. D. Kinsella No. 424

Minutes of meeting held at N. E. 32-45-12-4th, on Tuesday, November 19th, 1934.

Full council present.

Cr. Bowden, that minutes be passed as read, C.U.

Cr. Lissen, that general business be transacted at this meeting. C.U.

Cr. Lissen, that secretary write to the Department reporting that Musk-rats are doing considerable damage to the grades and to ask for permission to trap same. C.U.

Cr. Lissen, that the Council agree to the terms contained in the letter from the Tax Commissioner, C.P.R., in regard to arrears of taxes. C.U.

Cr. Drevbo, that the meeting adjourn. C.U.

Kindly note that there is no extension of time for the payment of Taxes during 1934, and all taxes and consolidation installments must be in the hands of the secretary on or before the 15th day of December.

United Church Notes

The services next Sunday will be at Paschenale, Roseberry and Irma at the usual hours. There is some uncertainty about the pastor, the Rev. J. R. Gosson, being able to take the services, but there will be arrangements made for the services to be held. It is expected that either Major Hardy of the Salvation Army, or the Rev. R. W. Griffith will supply for the town service, and the Fellowship Group will have charge in the country.

PEMMICAN HIDDEN
60 YEARS AGO GOOD

Six sacks of pemmican, thought to have been buried as a food reserve by Indians at least 60 years ago, were plowed up near Irma during the past season by Eldon Fenton, it was learned Monday. The incident recalls a similar discovery some months ago near Crossfield in the south of the province.

Each sack was made of buffalo hide and weighed about five pounds. They were cached in a hole in the prairie north of Grattan coulee, famed as a buffalo run in the days when the herds roamed the prairies and were hunted.

Mr. Fenton had brushed about the hole. In breaking the virgin soil last May, in a district first homesteaded 30 years ago, the plow turned up the sacks. Breaking one open with a pick axe, he found the meat in the centre soft and apparently well preserved.

Chewing some of it, Mr. Fenton said he found it tasty, having been preserved with wild cherries which showed red and the stones of which he found therein.

Since having been exposed to the air, it has hardened, J. D. Campbell, 10707 107 St., found when he visited the farm recently and inspected the pemmican.

As the buffalo were practically extinct in 1879, it is thought this cache must have been placed some years before that. The find was made 18 miles from the present national buffalo park. — Edmonton Journal.

MR. SMITH THANKS
CONVENTION

(Too late for last week)

I wish in this public way to thank all my supporters at the great Liberal Convention on Friday last. Not less sincerely do I thank Mr. D. R. McIvor of Stettler and Mr. C. G. Purvis of Viking who moved and seconded that the nomination be made unanimous, and also all the delegates who, by a standing vote, intimated that the convention was a unit in the determination to press forward to a victory for the principles of liberalism at the coming election.

The task ahead is a heavy one. The constituency embraces 180 polling divisions and more than twenty thousand voters. If victory lies ahead it will belong not to me but to all liberal minded people in this great constituency. I will do my best, but it will require the loyal support of all who realize the need for a "New Deal" if we are to achieve success in our effort to accomplish something which we hope will be of value to the people of Western Canada.

Faithfully yours,
GEORGE P. SMITH.

BANK OF MONTREAL STATEMENT
REVEALS STRONG LIQUID POSITION;
CASH HOLDINGS AT HIGH LEVEL

Of Total Assets of \$759,108,178, Liquid Assets Amount to \$491,247,207, Equal to 71.97% of All Liabilities to the Public — Cash Holdings Are Up to \$87,210,888 From \$78,683,271 — Excess of Assets Over Liabilities to Public Amounts to \$76,538,810.

The Annual Statement of the Bank of Montreal shows the Bank in its usual strong liquid position. Of total assets of \$759,108,178, quickly available resources are \$491,247,207, equal to 71.97% of all liabilities to the public.

A feature of the liquid assets is afforded by cash holdings of \$87,210,888, up from \$78,683,271 a year ago.

The principal holdings are in government and other bonds and debentures, which now amount to \$317,936,912, as compared with \$316,967,375 at the end of the previous year. The excess of assets over liabilities to the public has increased to \$76,538,810.

The report makes its appearance at a time when it is certain to be studied closely by all who are anxious to get a better understanding of the strong position in which the leading bank has maintained its resources.

Notwithstanding general evidence of more active manufacturing conditions, current loans are slightly down at \$243,477,041 as compared with \$251,885,262 at the end of the previous year. This would indicate that a number of Canadian companies still find it possible to finance business in its present volume without leaning heavily on banking accommodation.

Deposits Well Maintained
Deposits are well maintained, especially in view of recent large government bond offerings. Total deposits payable on demand and after notice are \$630,218,835, compared with \$641,346,710. Notes of the Bank in circulation are up to \$35,255,876 from \$33,819,907, doubtless reflecting a greater measure of general business activity.

Special interest is shown of total assets of \$759,108,178 with which to meet payment of liabilities to the public of \$682,569,368, leaving an excess of assets over liabilities to the public of \$76,538,810.

Profit and Loss Account
Profits for the year are reported at \$4,105,024, from which are deducted Dominion and Provincial government taxes totalling \$900,654, leaving net profits at \$3,204,369, equal to 4.23% on the combined capital, rest and undivided profits. From this amount has been paid \$2,850,000 in dividends to shareholders, as compared with

Proportionately low fares from stations between Calgary and Vancouver.

Tickets good in coaches only. No baggage checked. Children, 5 years and under 12, half fare.

Full particulars from local Agent.

United States Sends Protest

Complains To Persia Regarding Treatment Of Aviators

The United States has formally protested to Persia against the reported discourtesy shown there recently to two United States aviators in the England-Australia air race.

In a note that made no pretence of friendliness, detailing the treatment accorded John H. Wright and John Polando when they made a forced landing, Oct. 23, between Mohammerah and Abadan because of minor engine trouble, the United States said it was "at a loss to understand" the action of the Persian authorities.

Although granting Persian permission to fly across that country and land there if necessary, Wright and Polando were detained 24 hours and subsequently withdrew from the race at Karachi, India.

Squirrel Fights Hawk

Succeeds In Killing Bird After Duel In Air

A duel to the death in mid-air between a hawk and a squirrel is reported by an amateur naturalist in Schweinitz, Silesia. On the border of a forest near the town, he saw a hawk fluttering in clumsy circles close to the ground, with a small animal wriggling in its talons. Finally both plunged to earth. A moment later the observer saw a squirrel bleeding from many wounds, drag itself free and scramble up a nearby pine tree. The hawk lay dead, with blood pouring from a wound in its throat.

Plug tobacco goes farther, because it lasts longer in your pipe. It's fresher, too, because the big plug doesn't dry out and you cut it coarse or flaky, to suit yourself.

PLUG SMOKING TOBACCO

The Trend of Population and Power

"Go West, Young Man." Such was the advice tendered by a great American to the youth of the United States back in the last century. It was based, probably, upon a knowledge of the vast resources and wealth of opportunities of that then largely unsettled area. It may also have resulted from a study of the movements of people throughout the ages of the past, pointing to the historical fact that "westward the course of empire takes its way." At all events it is interesting to note that, for some reason or other, the movement of this world's population is largely from the east to the west.

In the dim dark ages of the past, Europe was settled by the migrations of people from Asia; Christopher Columbus and the other intrepid navigators who followed him opened the way for the great movement of people across the Atlantic from the countries of the old world to the new western world of the Americas; and on this continent the trek of people has constituted a steady stream from east to west. We speak of Japan as in the Far East, but even there the advice and slogan to-day is "Go West, Young Man,"—west into the new Japanese protectorate being carved out of Manchuria on the mainland of Asia.

In Canada we are, of necessity, profoundly interested in this trend of population to the west. It has already had a tremendous effect upon national and economic policies in this Dominion, and it is certain to have an even greater significance in the years that lie ahead. Not is it without its significance and value that this movement of population in Canada parallels the similar movement which has occurred and is still continuing to the south of the international boundary line of the two Americas.

The extent and rapidity of this western movement of population is revealed in a recent article in the Canadian Geographical Journal under the title "The Centre of Population Moves Westward," based on figures revealed by the census taken every ten years. As recently as forty years ago, (1891), only 7.2% of the population of Canada was to be found in the four Western Provinces, but that percentage has risen by progressive steps until at the last census taking, (1931), 25.5% of Canada's population resided west of the Great Lakes.

At the time of Confederation, the centre of population in Canada was near the city of Montreal; at the time of the last census in 1931, the centre of population had moved westward nearly 400 miles and was found to be located near Sault Ste. Marie, and practically 300 miles of this westward travel has taken place since the beginning of the present boundary.

Not only is the centre of Canada's population moving westward, but it is also moving northward. This is accounted for by two major factors,—the opening of the vast mineral regions of the pre-Cambrian area, and the fact that the Western Provinces lie in higher latitudes.

This movement of the centre of population steadily westward is, as already stated, having a pronounced effect upon both the political and economic life of Canada. Under our constitution, representation in the Parliament of Canada is based upon population; consequently the determining influence in national policies is steadily shifting westward, and the voice and ad's population resists west of the Great Lakes. If the same trend of population westward continues, albeit not quite so marked as since 1901, a few more decades will witness political power almost equally divided between east and west, with all that such equality in political power may mean in the national policies of the Dominion.

Coincident with this shift of the centre of population, and as the natural and inevitable result of it, the centre of manufacturing activity likewise moves westward. In 1890, the centre of manufacturing activity lay midway between Kingston and Pembroke in Ontario; now, forty years later, it is about midway between Sudbury and Sault Ste. Marie, and is, therefore, only about 60 miles behind that of population in the United States.

The centre of manufactures is nearly 180 miles behind that of population in its westward movement.

With the opening up of the northern mineral areas of Manitoba, Saskatchewan and Alberta,—which gives promise of being the next major development in the West as it was in Ontario and Quebec in recent years,—and with the development of the Churchill-Hudson Bay route, another change will take place in the economic relationship between east and west and further impetus given to the western movement.

Such developments are bound to have a marked effect upon both the political and economic life of this Dominion. It is true that as the centre of population and of manufacturing moves west the counter pull of the east of those centres will not be as rapid as in the years of heavy immigration and the settling of the prairie areas. But the northern development of the western half of the Dominion will assist in maintaining the western movement. The advice and slogan to youth to-day is not merely "Go West," but also "Go North."

Queen Is Puzzle Fan

Britons have learned their Queen is a jig-saw puzzle fan. Queen Mary was with the Princess Royal, the Countess of Harewood, visited the fair at the Imperial Institute, where handicrafts of disabled veterans is displayed and spent several minutes at one booth playing with a jig-saw puzzle. She then bought it.

Job For Someone

Anyone with experience in naming railroad cars or ice cream sandwiches might find a job in Poland where identifications are needed for 42,000 farming communities. The names, once chosen, will be permanent. Five years ago 142,000 of these projects sprung up and about two-thirds of them were named. It is for the others the government now seeks names.

Rubber From Flowers

Herman E. Pitman, chemist of St. Louis, is seeking to obtain patent protection for a formula by which he claims 60 per cent. of the rubber requirements of the United States may be extracted from a species of the polioetia. The plant, common as a decoration at Christmas time, thrives in southern states.

Approximately 11,800,000 words are spoken by the average man every year.

Would Amend Criminal Code

St. John Coroner Recommends New Law For Motorists Who Kill

"I am forced to the conclusion that one of our greatest needs is to modernize our criminal code," Dr. C. L. Emerson, Saint John city and county coroner, said in a letter published at Saint John, N.B. Pointing out the difficulty of obtaining convictions under the existing law in cases of death due to automobiles accidents, he suggested a new law less severe than that covering manslaughter, but sufficiently severe to prove a deterrent to those motorists inclined to disregard public safety.

"There are only two charges that may be laid against an individual causing death, namely, murder and manslaughter," wrote Dr. Emerson. "It seems to me that manslaughter is so severe that it is virtually impossible to get a trial jury to convict."

"If the crime were classed not as manslaughter but as some lesser crime, with a correspondingly less severe punishment, yet sufficient to deter a new law less severe than that covering manslaughter, but sufficiently severe to prove a deterrent to those motorists inclined to disregard public safety."

The coroner agreed with a suggestion that all cars involved in fatal accidents should immediately be impounded by police pending an examination of the brakes, and other equipment.

Simplest And Best Way

England Is Using Surplus Milk To Feed Children

"The simplest and best way of getting rid of a surplus of milk is to get that surplus milk used," said Walter Elliot, Minister for Agriculture, when he spoke to a meeting of Unionist teachers in Glasgow. Speaking of his recently launched scheme to give a child milk at school each day, Mr. Elliot hinted that it would be introduced to Scotland in the future. "No doubt," he said, "proposals will be worked out before very long in Scotland. We have at present in England 1,000,000 children getting milk every day, and we have set ourselves if possible, to raise that figure to 3,000,000 by Easter of next year."—Glasgow Herald.

Canadian Live Poultry For France

Two Hundred White Leghorns Shipped To Poultry Farm In France

Fifty white Leghorn cockerels and 150 pullets purchased from R.O.P. breeders in Western Ontario by L'Abbe A. Deckmyn, of Villers-Veron, Eure, France, were shipped from Montreal direct to France per the S. S. Lstia, on November 15th. This consignment of white Leghorns will be used for breeding purposes on the large poultry farm managed by Abbe Deckmyn. Recently he came to Eastern Canada primarily to acquaint himself with the methods of poultry raising and the quality of the stock in this country and he was much impressed.

The recent sale is a result of contacts made by officers of the Dominion Department of Agriculture at the World's Poultry Congress in London and Rome.

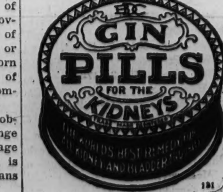

Three Sugars In Honey

Levulose (fruit sugar), one of the three sugars found in honey, is non-granulating and is usually the predominating one. The other two sugars are dextrose (grape sugar) and sucrose (cane sugar). Dextrose is a rapid granulating sugar. Sucrose is present in honey only in very small quantities.

There is a heavy public demand for information from the Dominion Entomological Branch on such subjects as improved sprays for household insects, moth-proofing chemicals and cleaning appliances, notably vacuum cleaners, in eliminating and destroying clothes moths and carpet beetles.

Sure Signs

Of kidney troubles are pain in the back, difficult urination, deposits in urine. Gin Pills relieve kidney trouble by gently soothing and healing the inflamed tissues. See box at all druggists.

New Plan Helps Mothers Solve Problem of Colds

Mothers Adopt Plan by the Makers of Vicks VapoRub for Better Control of Colds in the Home.

Introduced with the Remarkable New Aid in Preventing Colds—Vicks Va-tro-nol

Every mother is burdened with the problem of colds—especially the frequent colds of children. It is good news indeed, then, that the makers of Vicks VapoRub have perfected a Plan for Better Control of Colds in the home. The helpfulness of Vicks Plan in reducing the number and duration of colds has been tested by physicians—and proved in everyday home use by thousands.

The helpfulness of Vicks Plan in reducing the number and duration of colds has been tested by physicians—and proved in everyday home use by thousands.

Here, briefly, is how Vicks Plan works.

To Help Prevent Many Colds When children come in sniffing and sneezing, apply Vicks Va-tro-nol on each nostril. The Va-tro-nol yourself at that first scratchy, sneezy irritation of the nose and up to throat. Va-tro-nol stimulates the functions Nature has placed in the nose—to prevent colds, and to throw off colds in their early stages. Its timely use helps to avoid many colds entirely.

To Help Shorten a Cold If a cold strikes without warning, or slips by every precaution (as some colds always will) depend on Vicks Va-tro-nol. Rubbed on throat and chest, it attacks the cold direct—two ways at once—by stimulating the skin, like a irritative or plaster—and by inhalation of its medicated vapors direct to the inflamed air-passages. The combined action loosens phlegm, soothes irritated membranes, helps break congestion.

Also, with the use of these two products, Vicks Plan contains certain simple rules of health for building resistance to colds. Have your family follow Vicks Plan and help them to greater freedom from colds. Full details of the Plan are in each Vicks package.

Anti-Grasshopper Campaign

Estimate Of Wheat Saved In Western Provinces Is 25,385,000 Bushels

The anti-grasshopper campaign saved \$17,768,000 for farmers of all three prairie provinces, according to a Seale Grain Company report. The estimate of wheat saved for Alberta, Saskatchewan and Manitoba was 25,385,000 bushels.

Unofficial information gives the cost of fighting the grasshopper pest in all three provinces as considerably less than \$1,000,000.

Alberta's campaign accomplished the greatest saving of the three provinces: 11,339,000 bushels or 18.11 per cent. of the harvest.

Saskatchewan saved 9,632,000 bushels or 21.59 per cent. of the harvest.

In Manitoba 4,412,000 bushels were saved or 15.09 per cent. of the harvest.

Grasshopper infestation wreaked a loss of 14,343,000 bushels of wheat in Alberta; 3,997,000 bushels in Saskatchewan, 6,344,000 bushels, and in Manitoba, 4,002,000 bushels.

New Aid To Sailors

Device Measures Depth Of Shallow Water By Echoing Sound

A sound so shrill that it cannot be heard, which measures the depth of shallow water almost as accurately as a fathometer, is science's newest aid to sailors and navigators, announced by the U.S. Coast and Geodetic Survey. The new device called the "Echo Sounder" is designed to be an important aid to ships navigating in shallow water and in making charts of the bottom in shallow-water areas.

More than \$125,000,000 has been raised by "flag" collection days in Britain in the last twenty years.

In 1898, a waterspout 5,104 feet high was seen off New South Wales.

CHILDREN'S CONSTIPATION

Ended!

Mrs. H. T. Rowan, Athens, Ont., writes, "My baby boy was troubled with constipation. I gave him Baby's Own Tablets as directed. . . . Before I had given him the first tablet, he was constipated. By relieving constipation, Baby's Own Tablets prevent more serious abdominal developing. Most children to take them are healthy and happy, and perfectly safe for all little folk from the wee babe to children of school age. 25c package."

BABY'S OWN TABLETS

Bad Weather Hard On Human Skin

Cold winds, rain and snow are the cause of much irritation and soreness of hands, neck and face. Bad weather dries up the skin, makes it really lifeless, and eventually cracking and chapping.

Since 1875, millions of men and women have relied on Hinds Honey and Almond Cream for greater skin protection and skin comfort in bad weather. A smooth creamy lotion, Hinds Honey and Almond Cream gives relief immediately upon application. It soothes and heals raw, chapped skin, cooling and taking the sting right out.

Applied before exposure, Hinds Honey and Almond Cream supplies a shield moisture to your skin, protecting it from windburn and raw, damp air. Use Hinds generously on your face and hands, immediately after washing. Sold at all drug stores.

Has One Advantage

If an eagle can make only 120 miles an hour in flight, the airplane has smashed its speed record many times. But the bird still has one advantage over its mechanical rival. It can stop and roost on a mountain side without cracking up.

THE TENDERFOOT

By
GEORGE B. RODNEY
Author of "The Coronado Trail,"
"The Canyon Trail," Etc.

SYNOPSIS

"You've fallen near to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to see what was happening for himself—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wild west outfit.

Dad Kane, desert rat and night-prospecter, now is returning to tell Dustin and Solke Goddard, owners of the Broken Spur ranch, who had grabbed him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Solke Goddard and Sam Dustin, fearing the old prospecter may tell others the things he has seen, set to the branding of Carr's cattle, plot to get him to show them the location of the mine and then to kill him.

Gerald Keene, dressed in ridiculous cowboy costume, arrives at the Hour-glass ranch and is hired as a cowboy by Joe Carr. The impersonation of a tenderfoot is successful, and he is accepted as such by the other occupants of the bunkhouse.

(Now Go On With The Story)

CHAPTER V.—Continued

"Dustin! That damned crook! I wouldn't let him take care of a three-legged burro that I liked. He's been at the bottom of all our troubles."

"Yeah. I know that but we can't prove it. And that's what counts. Who's this new hand you took on, Joe?"

His hand swept toward the bunkhouse, where Stone stood talking to Lee and Worth, both of whom were laughing.

"Just a new man I picked up to-day. He came in and asked for a job. We got to have a new man and he's got to be cheap, so I hired him. He can ride fence. He's just a crazy fool who says he wants to learn the cattle business. He told me so when I hired him. He said he wanted to learn it from the ground up. We've got right down to the ground now in the Hour-glass," he said grimly. "He's starting good. Set him to work in the morning riding fence on the west line. Did you see his outfit?"

"Did I? I wish I'd looked like that when I was his age. I'd sure have filled the eye of some good-looking girl. Don't borrow troubles, Joe. It'll come fast enough. Give me a share of that drink."

Carr poured him a generous half-portion and shuffled the papers on his desk.

"If I had no more cares than that new hand," he growled, "I'd get drunk for a week. He ain't a bad looking kid. Pity he's such a damned fool. Anybody's a damned fool who tries to make money off cattle unless he's crooked at the start. Duro Stone! That's sure one hell of a name."

OLD PEOPLE
FEEL YOUNG

Just because more years than you give to count have been added to your life, calendar is no reason for feeling old. Age, after all, isn't a matter of years. It is a matter of health. Stay vigorous and stay young. But how, you ask. Do it the way thousands of people of advancing years do. Take Vincarnis regularly. Vincarnis is a delicious wine, free from drugs, that brings you all the valuable elements of grapes combined with the highest grade beef and guaranteed malt extract. Its invigorating effect is almost magical—yet perfectly natural.

These valuable elements in Vincarnis give your aging system exactly the stimulating nourishment it requires. They soothe your nerves, enrich your blood, and flood your whole body with almost youthful buoyancy and vigor. More than 20,000 medical men have heartily endorsed Vincarnis. It is a great tonic. It will make you feel young again by creating for you new stores of strength and energy. Get Vincarnis from your druggist—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

a refreshing ingenuousness about this new hand that amused her. But why under Heaven should any man take up such a life? If her father, who had been a cattleman for more than fifty years, could not succeed, how could an amateur like this man Stone look for success? She felt vaguely sorry for him.

"How'd you make out in the bunkhouse last night?" she asked. "Sometimes Baines thinks he's a qualified practical joker."

"He put some sand-spurs inside my shirt," said Stone. "But he was right pleasant about takin' 'em out after I rubbed his nose in 'em."

She laughed a little and to her own astonishment found herself flushing warmly under his eyes.

"I wouldn't let my horse eat all those fox-tails," she said in disparagement. "They'll make his mouth sore."

"Look! There's a cow over there."

"The first I've seen to-day."

A big, dark cow thrust through the heavy brush followed closely by a bawling calf that struggled for the natural rights. They watched the cow as she flung into the pool with the calf hanging at her flanks, and Edith's face suddenly hardened.

"Look at that cow," she said quickly.

"That's one of our Hour-glass cows."

"Well," Stone looked the calf over leisurely.

"Don't you see it's got the Broken Spur brand?"

"Haven't you ever read any Western fiction while you were tryin' to prepare yourself to be a cow-puncher? Don't you know that a cow will only raise her own calf?"

"Haven't you ever heard that?"

"Come to think of it, I believe I have," he said slowly. "But . . . look. The cow's a Broken Spur cow, too."

"There on her hind shoulder."

She laughed at the words but she was studying the calf. The Broken Spur brand stood out red and angry.

"Here's your first lesson," she said.

"I can see exactly what has happened. Whoever was doing the stealing, got the calf first. Then when the calf was branded, they had to change the brand on the cow."

"If they'd vented the calf it would have shown they'd been tampering with brands. Do you know what a running iron is?"

"Kind of a crooked iron poker, isn't it?" he asked innocently.

"Something like one. I hope you never have to use one. It's used to renew brands."

"Or to steal cattle. It just happens that I know that cow. She's one of our blooded stock and was a milk-cow at the ranch."

"Evening of the Hour-glass knows her. Why, her flank is hot yet from the iron."

THE RHYMING
OPTIMIST

By Aline Michaels

NIGHT'S FREEDOM

At night with my windows open
To the wide sky's star-set arch,
The room behind me silent
And Earth's footprints a distant march.

I am free with a splendid freedom
Which in day I cannot boast,
With the deepening shadows about me
And above the starry host.

I am free with a soaring freedom
For the quest I most desire
In chosen ways of hope and dreaming
While night and silence conspire
To bring me such joyous promise
As by day I never knew.

When I lie with my windows open
To starlight and thoughts of you!
Leaves Money To College

Christian Smith, the German tailor who had pressed the clothes of Dartmouth College students for the past ten years, left his life's savings of \$9,000 to the faculty of the college, the probations of his will disclosed. To a son and daughter he had not seen since the Great War he left \$1 each.

Penalty That Fits

There is only one adequate punishment for persons who sit in the wheel of an automobile continuously in peril life and limb of other citizens and that is to deprive them of their driver's license for six months or a year, according to the gravity of their crime, says the Calgary Herald.

Detroit Ladies Destitute Through No Fault Of Their Own

The financial trails of the world are scattered with the wrecks of investment programmes. In each of them is a poignant personal tragedy.

The other day, four old ladies applied for old age pensions from the State of Michigan. Their ages ranged from 74 to 82. They are the daughters of one of Detroit's early and wealthy citizens—a man who was so well-to-do and so public-spirited that he donated to the city of Detroit the site on which the City Hall now stands. The property this family once owned is to-day valued at \$8,000,000, but the four daughters are practically penniless.

Here is presented the perfect opportunity to draw the moral of the value of thrift and investment. But when one looks into the circumstances one finds that the moral is sheer irony applied to this case. One of the daughters told newspaper reporters the other day:

"I don't believe we are to blame because we are destitute at our ages. Now take my own case, for example. I saved my money against old age. I was advised to buy bonds and so I bought them, real estate bonds through a Detroit bank. They are worth nothing now. I can't collect a penny."

This happened in Detroit, but the same thing has happened all over Canada. What an argument it is for the strengthening of companies legislation, the better regulation of security selling and the promotion of higher standards of competency and ethics in the investment business.—Financial Post.

THE GOOSE CAME HOME TO DIE

(By JACK MINER)

There is a seven foot fence that Mr. Henry Ford built around my 30-acre bird sanctuary, which takes in our home.

As my home is private property the same as yours, we have the gate open to the public every day except Sundays when the birds are at their best which is from November 15th to December 15th, and from March 15th to April 15th, and yesterday while I was patrolling the north part of the sanctuary, Mrs. Miner saw a Wild Canada Goose came walking in. It came slowly down the drive and sat or laid down at the grade door of our home.

Three gentlemen were present including Mr. Andrew A. Gawley, the man with the steel hands from Montreal, Ontario, and they saw Mrs. Miner walk out and pick the goose up and try to care for it, but it died in about one hour.

Now there is never any shooting done within one mile of our home, nor was there any shooting done within this distance yesterday, but this goose was freshly shot because the blood was dripping from its wounded side, and it came home and died at our door. We have no idea how far away this bird received its wound but we have proof that a few years ago one was shot over 7 miles away and came home and died beside our house.

Not European French.

French-Canadian Habitant Is More

Racial background of the French-Canadian is an admixture of Teutonic, Breton and Celtic blood and in this respect he is more like the Englishman than the Old Country Frenchman, Professor W. M. Whitelaw, professor of history at McGill University, stated. The vivacity which was usually associated with the French character, was absent from the make-up of the French-Canadian Habitant, the latter being rather a "slow-moving person," Prof. Whitelaw declared.

A Strange Custom

One of the oldest races in the world and one of the strangest is the 400-year-old Palio race held annually at Siena, Tuscany. Before each race the horses entered are led to the church altar complete in silk and velvet trappings and holy water is sprinkled on their heads by the priest.

According to the latest statistics, every Canadian in 1933 used 15 pounds of soap, or 63 pounds for each family. The total production of all kinds of soap in Canada in 1933 was 159,127,624 pounds, valued at \$12,283,376 at factory prices.

Two caps on a milk bottle keep out more contamination than one cap is the report from research workers to the American Journal of Hygiene.

Commemoration Medal

To Issue Medal In Connection With 25th Anniversary Of The King's Accession To The Throne
Arrangements have been made for the issue next year by the royal mint of a medal in commemoration of the 25th anniversary of the King's accession to the throne.

The medal will show on the obverse side specially-drawn crowned effigies of their majesties with the inscription in Roman letters MCMXXV (1910-1935). The reverse side will bear a view of Windsor Castle as the principal house of the royal house of Windsor.

The medal will be issued in two sizes. The larger will be 2½ inches in diameter struck in standard silver and available to the public at a cost of a guinea (approximately \$5) apiece. The smaller, struck in fine silver, will be 1½ inches in diameter and will be obtainable for half a crown (approximately 60 cents).

Special arrangements for sale of the medal in the Dominions will be announced later.

Most Modern Equipment

France Had Impressive Exhibit At International Air Show

Modern equipment for countering aerial attacks was a feature of the French exhibit at the International Aeronautical show, which opened in Paris recently. France showed her preoccupation with the menace of invasion from the air by an impressive governmental exhibit of the latest advances in anti-aircraft war machinery. Prominence was given long range, rapid-firing cannon and extremely sensitive detectors which can "pick up" the approach of an enemy long before the hostile bomber or dirigible has come into view.

At Marylebone Court it was alleged that a tenant kept a gramophone, a sewing machine, a kettle-drum and a baby. Possibly this is an exaggeration. He may merely have been learning to play the bagpipes.

Little Helps For This Week

"The Lord is thy keeper, the Lord is thy shade upon thy right hand." Psalm 121:5.

"Great peace have they that love Thy law, and nothing shall offend them." Psalm 119:165.

I rest beneath the Almighty's shade,
My grief expires, my troubles cease;
Thou, Lord on whom my soul is stayed,
Will keep me still in perfect peace.

One great sign of the practical recognition of the "divine moment" and of our finding God's habitation in it, is constant calmness and peace of mind. Events and things come with the moment; but God comes with them too. So that if He comes in the sunshine we find rest and joy, and if He comes in the storm we know He is King of the storms and our hearts are not troubled. G. D. Himsel, though possessing a heart filled with the tenderest feelings is nevertheless an everlasting tranquillity, and when we enter into His holy tabernacle our souls necessarily enter into the Tabernacle of rest.—T. C. Upham.

The 1924 wheat crop of Canada is estimated at 277,504,000 bushels, consisting of 270,282,000 bushels of spring wheat and 7,022,000 bushels of fall wheat. The unreserved estimate for 1933 was 269,728,000 bushels.
